DETAILED ACTION

Response to Amendment

1. The amendment filed 6/1/04 has been entered. Claims 1,4,10,18 are amended; no new matter has been added. Claims 1-24 are under consideration.

Claim Rejections

2. All claim rejections and objections presented in the earlier office action are overcome by the amendment and withdrawn in view of the arguments.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Claims:

Claim 1; line 4: Replace "numeric aperture" with "numerical aperture".

Allowable Subject Matter

4. Claims 1-24 are allowed.
5. The following is an examiner's statement of reasons for allowance:

As argued by the Applicant the cited references do not teach the elements of modifying the layout in view of the lithographic equipment or process windows. Further Koh and Young's inventions are incompatible in terms of the process steps.

US PGPUB 2003/0237064 teaches the elements of the instant claims (fig.3,6-11). However it is not prior art.

US Pat.5804084 to Nasby et al. teaches that, in MEMS process, topological variations are addressed by layout design; but is not specific in its teachings of re-design (1;38-47).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

6. Applicant's arguments were considered in allowing the claims.
